

SCIEXUniversity Learning Path Snapshot

Introduction to LC Maintenance

For Basic Users: TRNSU150

This course provides a variety of hands-on LC-MS maintenance training, with a focus on your LC system. You will learn how to recognize LC issues on your LC-MS system, perform recommended maintenance, and exchange various consumable parts to keep your system running properly. It is intended for those who have completed a SCIEXUniversity Success Program or have some operational experience with SCIEX LC-MS systems. The program includes a blend of self-paced online courses and 1 day of instructor-led training at your site provided by a qualified Service Professional.

You Will Learn:

1. How to recognize LC issues on your LC system
2. Strategies for troubleshooting various chromatography issues
3. How to proactively maintain your LC system
4. How to exchange consumable parts to keep your system running properly
